

710

Meccanismo con movimento d'apertura frontale mediante rotazione dello schienale in un unico movimento. Il passaggio della posizione divano alla posizione letto avviene senza muovere o rimuovere nessuno degli elementi di tappezzeria. Il meccanismo è dotato di cestello a baionette che permette il fissaggio dei braccioli e dello schienale al meccanismo. Questo dà la possibilità di fissare diversi modelli, a scelta, di schienali e di braccioli che si montano e si smontano separatamente dal meccanismo. Il piano dormita può essere elettrosaldato, a doghe o a doghe larghe. Il piano seduta, per tutte le versioni, è a cinghie elastiche.

ENG

Front-opening mechanism through rotation of the backrest with only one movement. The bed can be opened without removing the cover. The mechanism is equipped with a bayonet basket that allows to fix the backrests and the armrests to the mechanism. Several models of armrests and backrests can be assembled and dismantled separately from the mechanism. The bed base can be electrowelded or provided with slats or large slats. The seats of all models are provided with elastic straps.

ESP

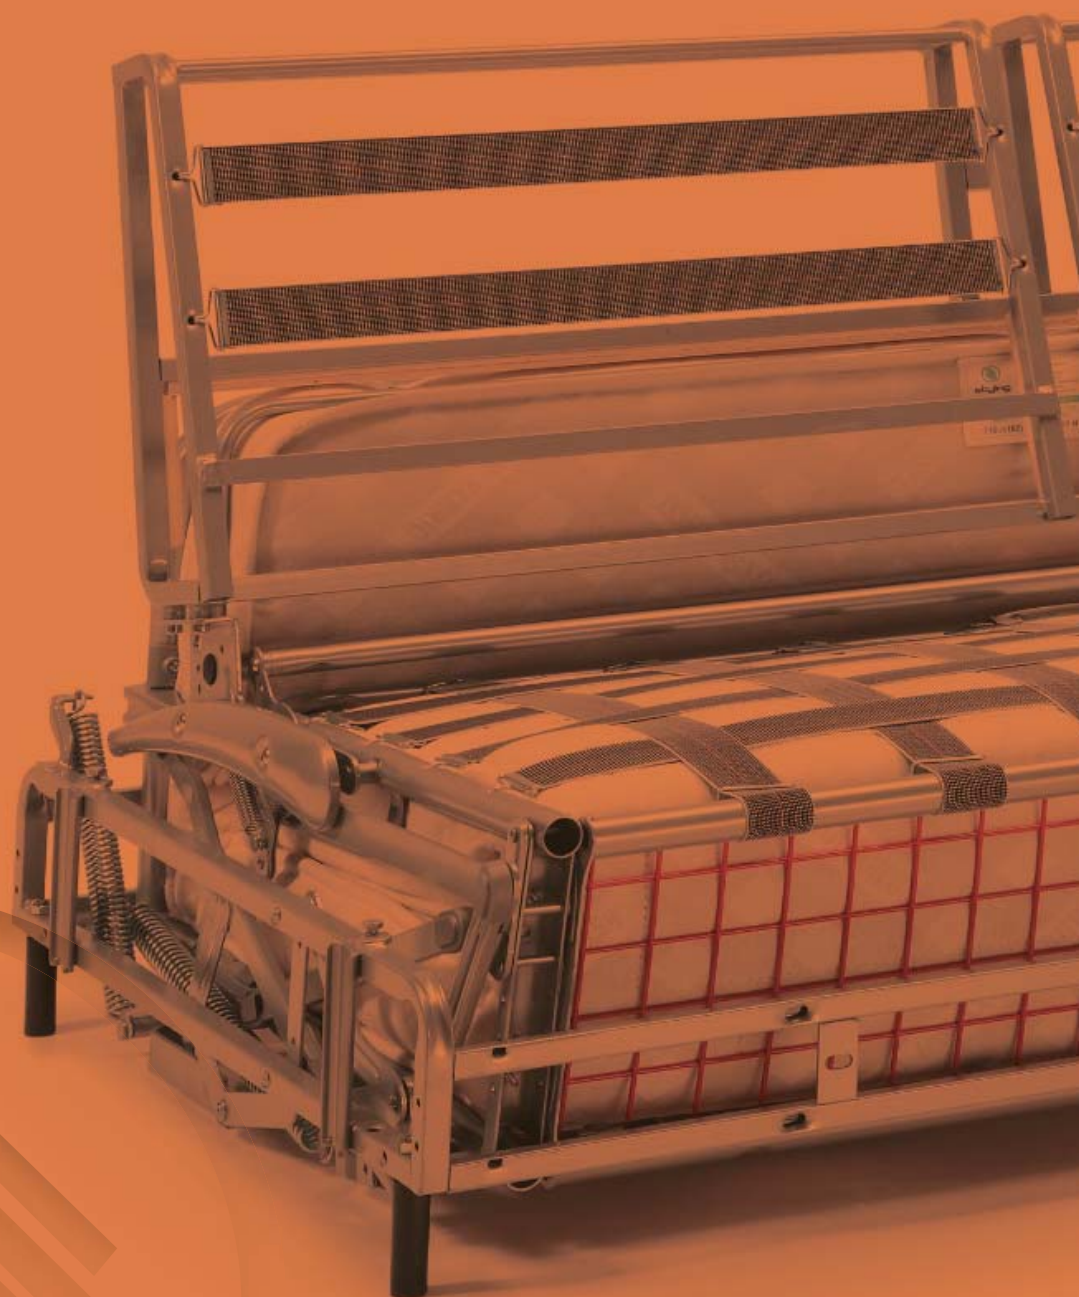

Mecanismo de movimiento con apertura frontal mediante rotación del respaldo en un único movimiento. El paso de la posición sofá a la posición cama tiene lugar sin mover o quitar ninguno de los elementos de la tapicería. El mecanismo está dotado con cesta a bayoneta que permite fijar los apoyabrazos y el respaldo al mecanismo. Esto da la posibilidad de crear diferentes modelos, según la elección, de respaldos y de apoyabrazos que se montan y desmontan de forma independiente a los mecanismos. El plano-cama puede ser electrosaldado, a láminas, o a láminas anchas. El plano - sofá, para todas las versiones, es en cinchas elásticas.

FRA

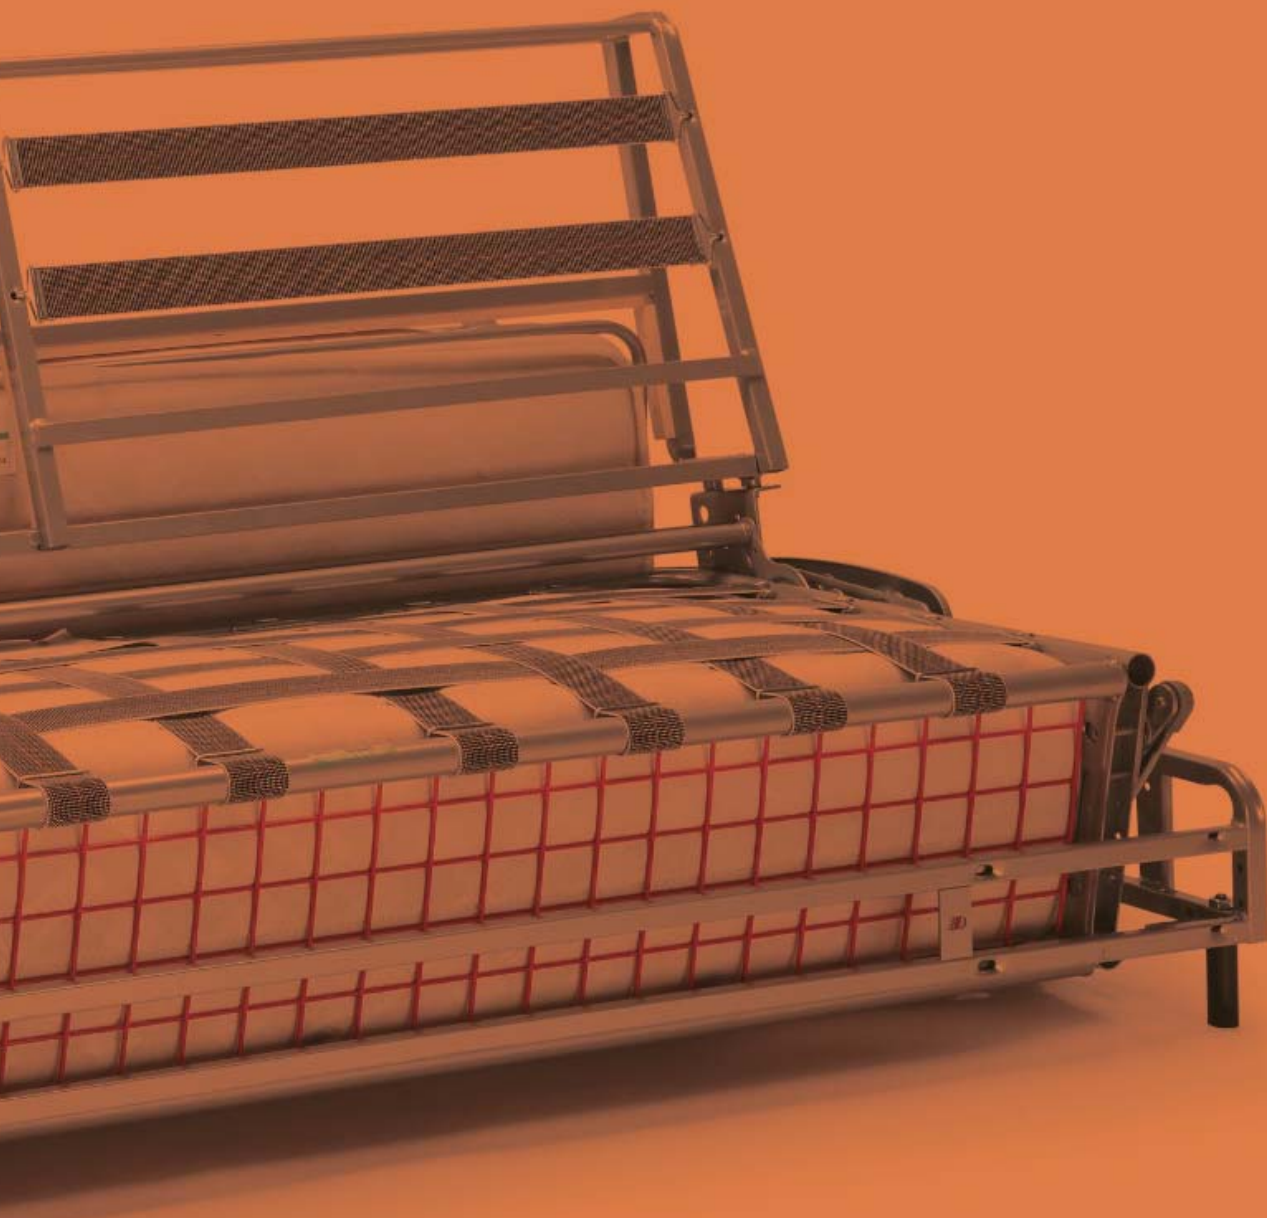

Mécanisme encastrable avec mouvement d'ouverture frontale par rotation du dossier avec un seul mouvement. Le lit peut être ouvert sans enlever la housse. Le mécanisme est pourvu d'un coffre à baïonnettes qui permet de fixer les accoudoirs et le dossier au mécanisme. Les dossiers et les accoudoirs peuvent être assemblés et désassemblés séparément. Le plan de couchage peut être électrosoudé ou pourvu de lattes ou de larges lattes. Le plan d'assise de tous les modèles est pourvu de sangles élastiques.

DEU

Mechanismus durch einfaches Drehen der Rückenlehne und mit nur einer einzigen Bewegung frontal ausziehbar. Die Verwandlung von Sofa zu Bett geschieht ohne ein Anbauteil verschieben oder entfernen zu müssen. Der Mechanismus ist mit Bajonett-Anschlüssen ausgestattet, um so Armlehnen und Rückenlehnen einfach anzubringen und sie jeweils, unabhängig der Produktfamilie des Mechanismus, befestigen und abnehmen zu können. Diese Vorrichtung ermöglicht es somit, je nach Wunsch, unterschiedliche Varianten an Rückenlehnen und Armlehnen zu montieren. Die Liegefläche gibt es elektrogeschweißt oder mit Holzfederleisten in Standard- oder breiter Ausführung. Die Sitzfläche ist für alle Versionen mit Polstergurten ausgestattet.
